Dataset deduplication report (dedup_report.json)

Contents of dedup_report.json — Medical Image Analysis Assistant

Deduplication summary

Item	Value
Images before deduplication	3264
Duplicate copies removed	867
Images dropped (label conflict)	39
Images after deduplication	2358
Groups containing duplicates	556
Near-duplicate Hamming-distance threshold	4

Patient-independent split counts

Split	Total	Tumour	Healthy
Train	1650	1450	200
Val	354	311	43
Test	354	311	43

Four-class counts after deduplication

Class	Images
Glioma tumor	761
Meningioma tumor	689
Pituitary tumor	622
No tumor	286
